- bat exposure
- animal acting strangely

1. A stray dog scratches your leg and runs away.

☐ Low ☐ Medium ☐ High

Best next step: _____

2. A friend asks you to touch a sleeping street dog.

☐ Safe ☐ Unsafe ☐ Not sure

Best next step: _____

3. You wake up and find a bat in the room.

☐ Ignore it ☐ Ask for help ☐ Wait for symptoms

Best next step: _____

4. Your vaccinated family dog licks your intact skin.

☐ Low risk ☐ High risk ☐ Emergency

Class discussion prompt

Why is waiting for symptoms unsafe after a possible rabies exposure? Write one reason, then discuss with your teacher or parent.

Worksheet for classroom discussion - answers should be reviewed with a teacher, parent, or health professional.

If a bite, scratch, or saliva exposure occurs: wash with soap and running water, then seek urgent medical advice.
